BSW16 and TSE, $\varepsilon = 1/n$, $n = 20$
TSE, $\varepsilon = 0.1$
one call, folklore $M = k_\gamma d$
one call, $M = d$
bound of LM09 for $M = d$
one call, best M
one call, $M = d/\sqrt{n}$, $n = 20$
proven radius $\gamma\alpha$
